TestFlow Mobile app functions

The OX1 unit may be paired to TestFlow Mobile app to:

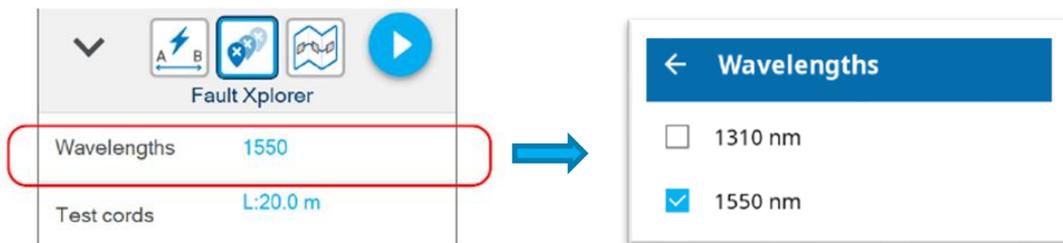

- Create PDF single test report
 - Customize job information
 - Store test results to the cloud
 - Create PDF Job report
- TestFlow credentials required

Quick Test Setup

1.1: On bottom left of the screen, tap the arrow key to access the quick setup menu

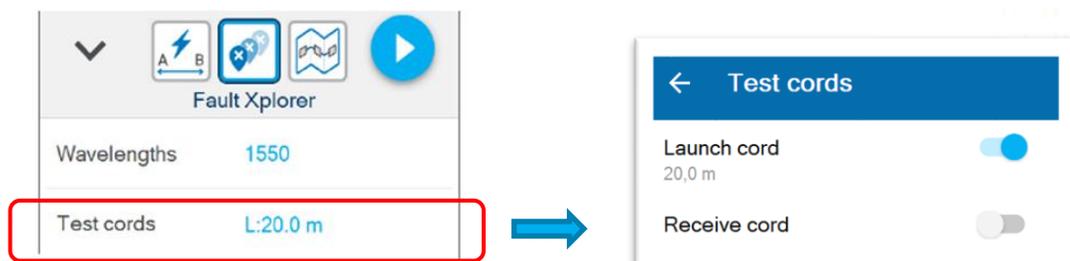

1.2: Select the required wavelength(s)

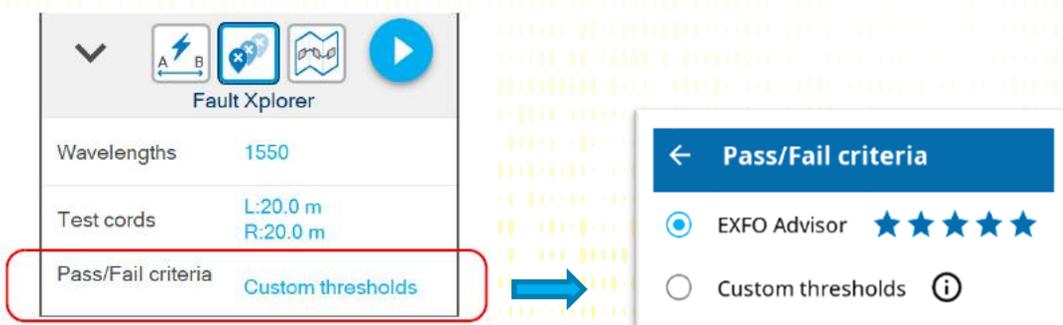

1.3: Set up the test cords

(Recommended Length: 20m (APC connector) – 60m (UPC connector))

1.4: Select Pass/Fail criteria among:

EXFO Advisor™, the 5 star rating of fibre link health
or Custom thresholds to edit customized thresholds

Test and Results

1.1: Select the desired test function:
Flash Advisor, Fault Xplorer or Link Mapper (on Pro model only)

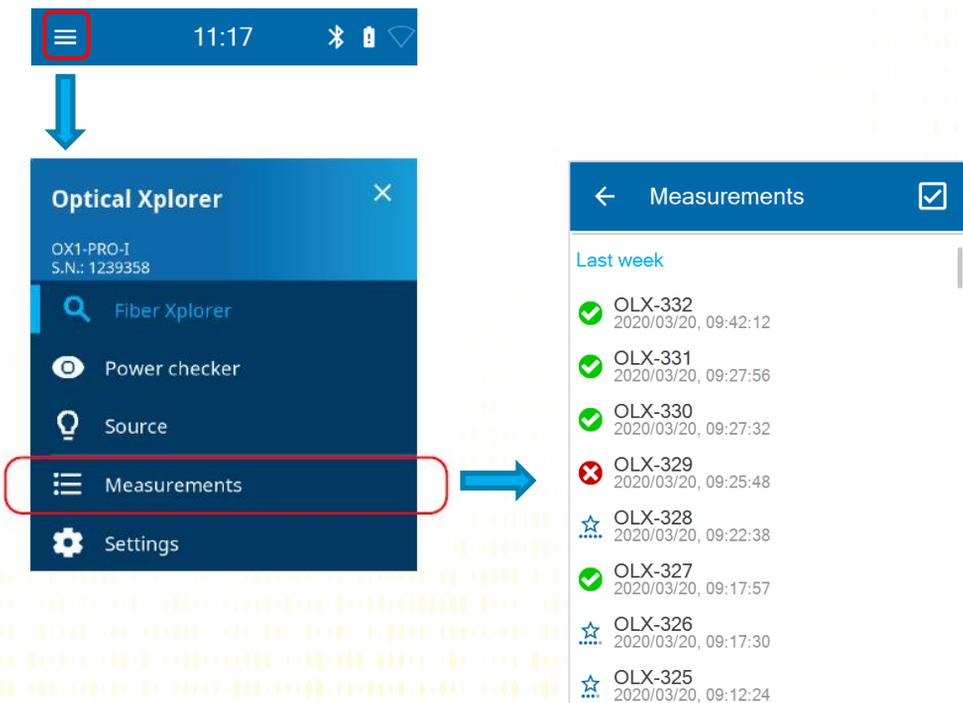

1.2 Tap start button

1.3 Tests results are stored automatically. File auto-naming and auto-increment is enabled by default (*OLX-XXX format*)

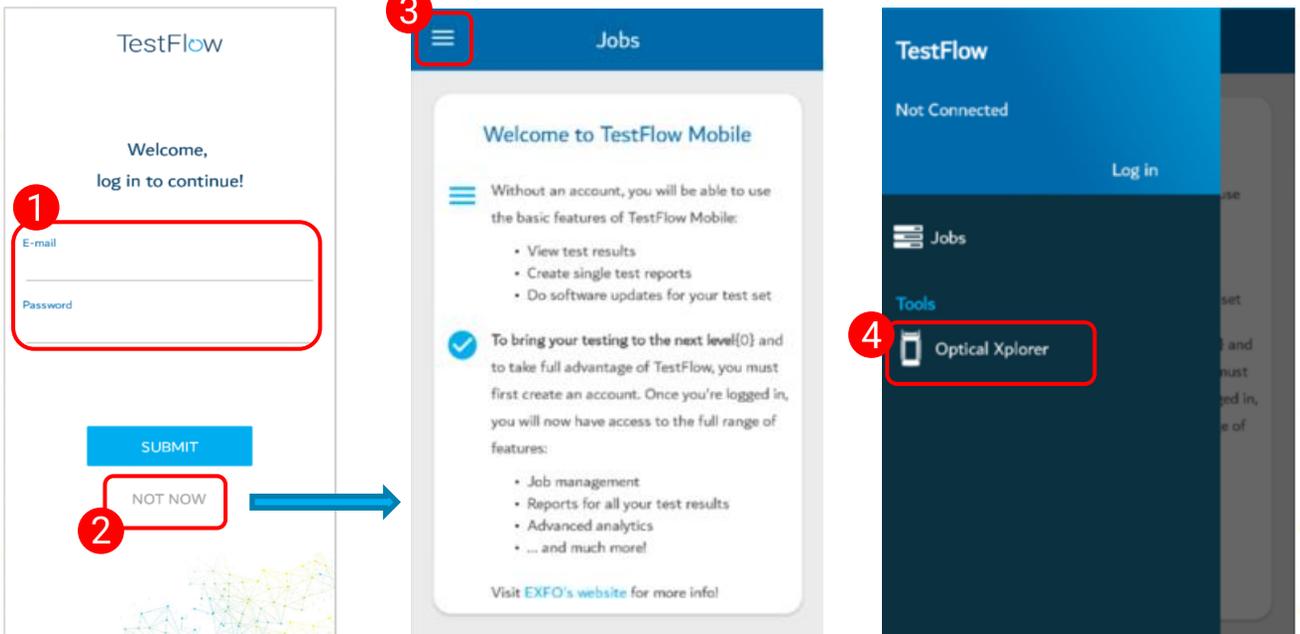

1.4: To view and manage results , tap on measurements from the main menu

Pair OX1 unit to your Smartphone

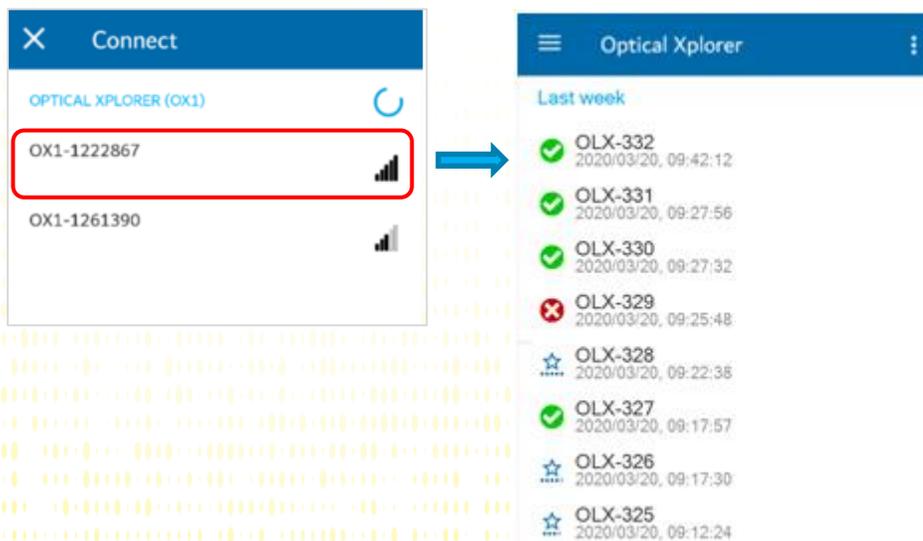

1.1 If you have a TestFlow account, enter your credentials (1) to enter TestFlow Mobile app. Otherwise, Tap “NOT NOW” (2) and Open the main menu (3)

1.2 Select Optical Explorer (4)

1.3 Pair the desired OX1 unit to your Smartphone

(Bluetooth function must be activated both on the OX1 unit and the Smartphone)

Once paired, OX1 results are displayed on your Smartphone

Create PDF single test Report

- 1.1 Once the OX1 paired to your Smartphone, Tap on the desired measurement to open it (1)
- 1.2 Tap the three dot menu (2) and Select PDF report (3)
- 1.3 Edit Report information and Tap CREATE (4)

The image illustrates the process of creating a PDF report from a single test measurement in the EXFO Optical Explorer mobile application. It consists of four sequential screenshots:

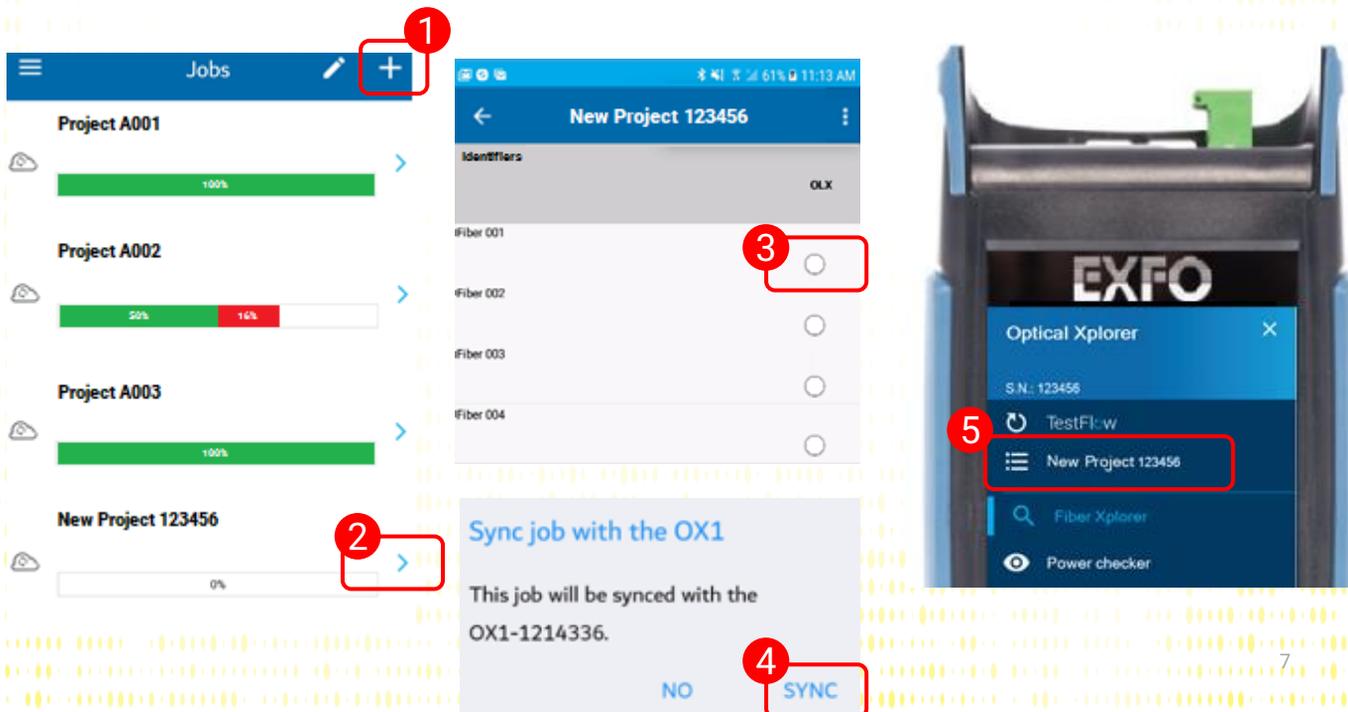

- Step 1:** The 'Optical Explorer' main screen shows a list of measurements under 'Last week'. The measurement 'OLX-328' (dated 2020/03/20, 09:22:36) is selected and highlighted with a red box and a red circle labeled '1'. A blue arrow points to the next screen.
- Step 2:** The 'OLX measurement' screen for 'OLX-328' is shown. The three-dot menu icon in the top right corner is highlighted with a red box and a red circle labeled '2'.
- Step 3:** The menu is open, and the 'PDF report' option is selected, highlighted with a red box and a red circle labeled '3'. Other options include 'OX1 settings' and 'Disconnect from OX1'.
- Step 4:** The 'Report details' form is shown. The 'CREATE' button in the top right corner is highlighted with a red box and a red circle labeled '4'. The form contains fields for 'Title' (OLX-015), 'Identifiers', 'Job ID', 'Operator', 'Customer', 'Location', 'Fiber ID', 'Comments', 'Additional information', and 'Measurement date'.

Work in Job Mode with TestFlow

OX1 unit can work in pair with TestFlow Mobile app and download a TestFlow job consisting in a list of predefined fibers to be tested. Once the job completed, the OX1 results are uploaded to TestFlow via the app, enabling the cloud archiving and all TestFlow features (ex: job report)

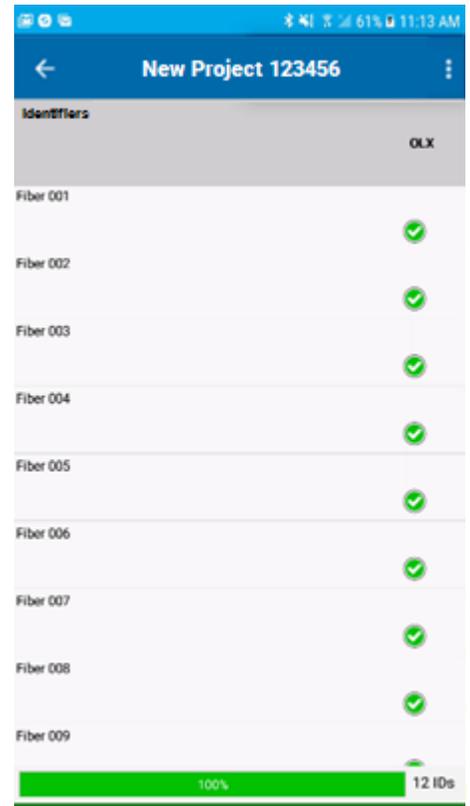

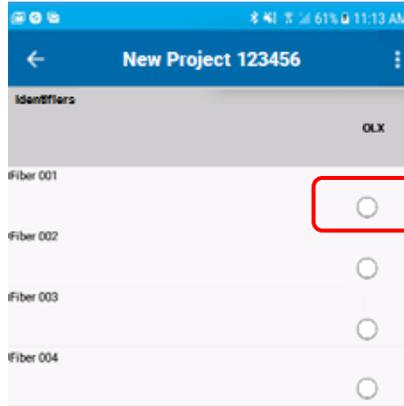

Complete a TestFlow job with OX1

- 1.1 Logon to the TestFlow Mobile App
- 1.2 If a job has been created by your administrator, go to 1.4 section
- 1.3 To create a new job In the **Jobs** screen, tap on **+** icon (1)
 - (1/4) Select **Blank job** and tap **NEXT** on top right
 - (2/4) Edit the Job ID, names and locations and tap **NEXT**
 - (3/4) Select **OLX (Optical Explorer)** and tap **NEXT**
 - (4/4) Edit the project information and click **CREATE**
- 1.4 The new Job is displayed in the job list. Tap **>** of the desired job (2)
- 1.6 Click on **○** icon of one fiber to be tested (3)
- 1.7 On the pop-up menu, tap **SYNC** (4) to sync the job with the OX1
- 1.8 The job is downloaded into the OX1. Open it and test until completion (5)

Job cloud storage and Report

1.1 Once the job completed into the OX1, display the job in TestFlow Mobile and Tap  to sync back OX1's results into TestFlow Mobile. All results are automatically stored in TestFlow cloud.

1.2 Job report generation can be done on TestFlow Mobile if needed. Into the job Tap  and Select **Generate report**
